Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from **Electric Wiring and Lighting** Electric lighting virtually started with the invention of the Edison incandescent lamp in 1878, the discovery of this very useful and flexible lighting unit marking an epoch not only in home lighting, but also in the actual development of the electrical industry itself. This invention had been preceded by the invention of the higher powered but less flexible arc lamp, and these two fundamental lighting sources have been the standards of electrical illumination since that time. The last few years have seen many notable improvements, not only in the methods of lighting but in the light units themselves. The enclosed arc, the flaming arc, the Moore tubes, and the Nernst lamp have all contributed to this wonderful development, but the recent improvement in metallic filament lamps, notably the Tungsten, has given an impetus which is second only to the original invention of the incandescent lamp itself. To cut the energy consumption per candle-power from 3.5 watts to 1.25 watts is certainly a triumph, and this improvement has opened up many fields of activity hitherto closed to incandescent lighting. It has even made the beautifully effective, but criminally inefficient, method of indirect lighting economically possible. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority...
