IMPACT OF CHINESE NAVAL MODERNIZATION ON THE FUTURE OF THE UNITED STATES NAVY (PAPERBACK)

DOWNLOAD

Nova Science Publishers Inc, United States, 2006. Paperback. Condition: New. UK ed.. Language: English . Brand New Book. China s rapidly developing military capabilities have forced US policy makers to reconsider their own military infrastructure. The primary concern of this book is to examine how China s military modernisation will be factored into decisions about US Navy programs. Several elements of China s military modernisation have potential implications for future required US Navy capabilities. These include theatre-range ballistic missiles (TBMs), land-attack cruise missiles (LACMs), anti-ship cruise missiles (ASCMs), surface-to-air missiles (SAMs), land-based aircraft, submarines, surface combatants, amphibious ships, naval mines, nuclear weapons, and possibly high-power microwave (HPM) devices. This book will examine how these elements and others will influence the future of the United States Navy.
